

A new feature was added with this update. When a document is displayed, there is now a toolbar visible at the top and bottom of the document, as illustrated by this example.

The user can page through the document using the next page/previous page buttons. The user can also scroll through document by dragging the document up or down.

The user can zoom in or out, as well as use the full screen option.

The best feature is the ability to download and/or print, use the Download PDF button.
